Garden Club

Melissa Petty reported that the garden club can not fund the sod and dirt removal by the high school and subsequent planting of flowering trees. As of now options are 1) pay to get it completed; 2) have a service day to get it completed and save some money. There is concern around the timing of painting the high school which will destroy the newly planted items. Mr. Tress will keep us informed of the status of the painting project so that we can make a decision on what to do for high school landscaping.
